Volume 03 , Issue 04 , Quarterly Performance Review Oct to Dec , 2014

Introduction:

Since Feb 2007, PPHI was the name given to a Public . Private Partnership between the Sindh Rural Support Organization (SRSO) and the Government of Sindh (GOS). PPHI - Sindh is now the name of a private "Company" registered under section 42 of the Companies Ordinance, 1984. In January 2014, this new Company received the assignment that was earlier with the SRSO. The first Partnership and the present are both for the management of Primary Healthcare (PHC) infrastructure of the GOS.

In Feb 2007, when the GOS took the innovative route, it had only one object in mind. Its PHC infrastructure in the rural areas - valued conservatively around Rs. 20 Billion - was either sub.optimally operational or altogether dysfunctional. The Health Profile of the population was so disturbing that this infrastructure had to be made urgently and optimally operational. The route taken was to "Contract - out" management of Government of infrastructure to the Private sector. It was named PPHI. It started with just one District - Kashmore - and now extends to 21. PPHI - Sindh presently manages 9 RHCs, 649 BHUs, 34 MCHCs and 435 Dispensaries, etc - a total of 1139 Health Facilities in rural Sindh. This is the size of the opportunity and the challenge for the PPHI . Sindh.

PPHI has come to mean arranging many more Healthcare Providers specially in remote and hard.to.access rural areas. It has come to mean Healthcare for Mother & Child; sufficient availability of essential medical supplies; Health Education; Immunization;

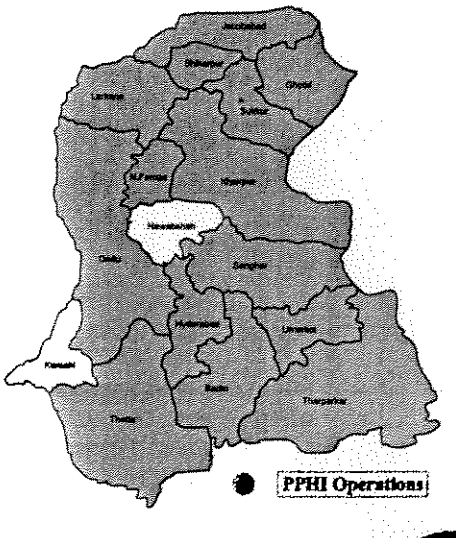
Communities connected with Health Facilities (HFs). It has come to mean so much more as the following pages shall show.

Your comments shall help us in serving the Poor in rural Sindh better. We request you to advise us and to guide us. We eagerly wait to hear from you.

Mission:

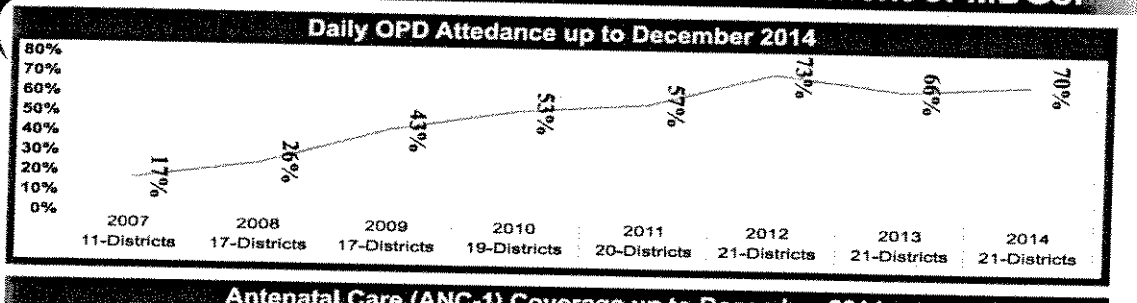
- To bring the Primary Health Care (PHC) infrastructure, that was by and large dysfunctional, to an optimum level of performance in terms of all the eight constituents of the PHC.
- To achieve the above without the use of any significant additional resources. To demonstrate a better and more efficient use of the available human and financial resources.
- To assist in the evolution of a sustainable PHC program that the state and the citizen have reasons to be satisfied with.

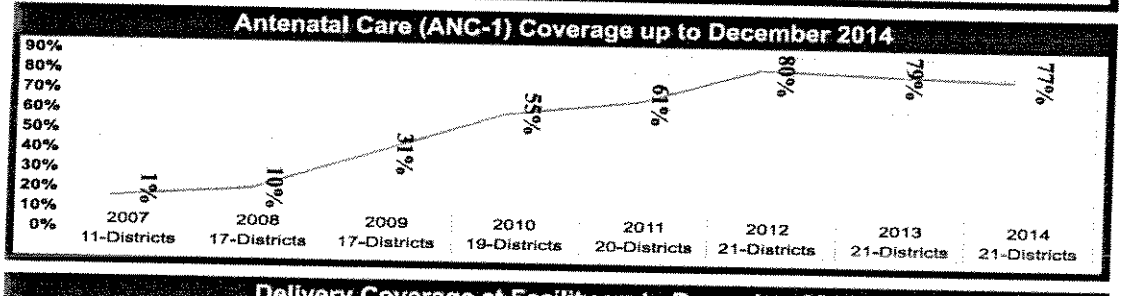
S.No.	Type of PHC-HFs	Total HFS	HFs with Health Deptt	HFs with PPHI	%age
1	RHC	113	104	9	8%
2	BHUs	782	133	649	83%
3	MCHCs/ Maternity Homes	90	56	34	38%
4	Dispensaries	835	400	435	52%
5	Others	132	120	12	9%
Total		**1972**	**833**	**1139**	**58%**

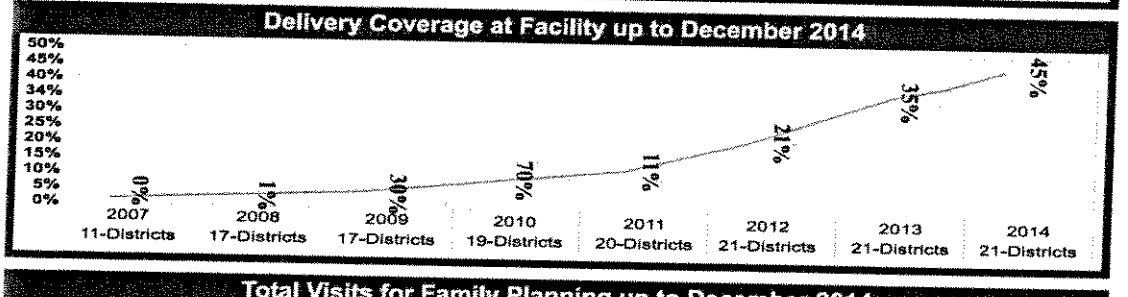


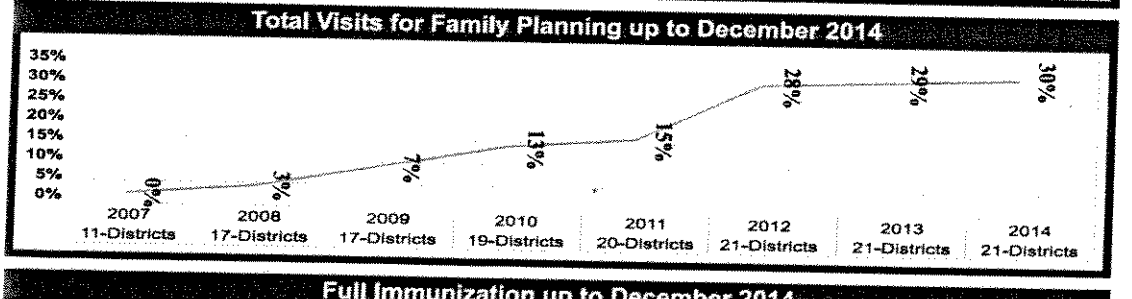
Source: The data has been collected on HMIS/DHIS format from all incharge MOs of HFs. There has been no comment on its validity from any Stake-Holders.

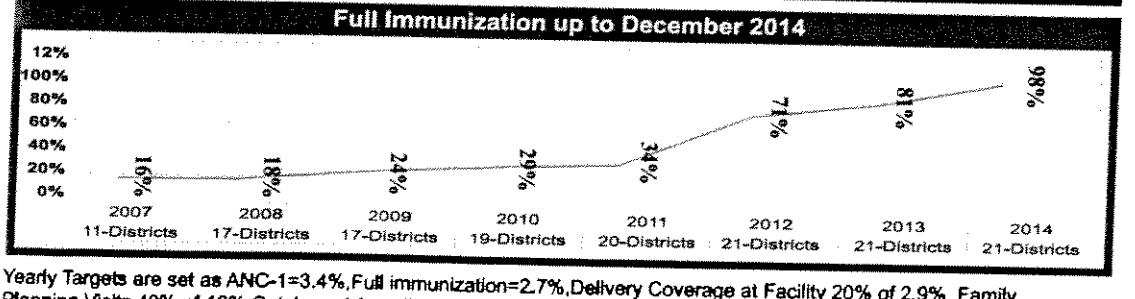
PPHI 08 - Years Contribution towards Achievement of MDGs:











Yearly Targets are set as ANC-1=3.4%,Full immunization=2.7%,Delivery Coverage at Facility 20% of 2.9% ,Family Planning Visits 40% of 16% Catchment Area Population whereas Yearly OPD attendence = Catchment area Population

* 2.Catchment Area population are provided by DHO of concerned district.

Source: The data has been collected on HMIS/DHIS format from all incharge MOs of HFs. There has been no comment on its validity from any StakeHolders.

PPHI Bulletin - A Contribution to Health Information System:

Dr Riaz Ahmed Memon
CEO

Dr Abdul Sattar Chandio
Director (Health Services)

There have been many efforts to arrange a dependable Health Information System. PPHI, under the leadership of its CEO and Dr Abdul Sattar Chandio, Director Health Services, after considerable preparatory work, has re.organized DHIS for its own reporting. PPHIfs data can now be shared among stakeholders with a degree of confidence . All PPHI data is collected through the incharge MOs at HFs on HMIS / DHIS proformas. This data is randomly checked. The Dr. Abdul Waheed Shaikh Public Health Specialist PPHI Senior Manager IT, Mr Uzair Aslam Bhatti, has very competently placed the DHIS software, developed by the Ministry of Health / JICA, at the PPHI website. The District level staff, after collection of the monthly report, enter the data into DHIS software directly. This data is accordingly compiled and disseminated with due confidence in its accuracy. We at PPHI continue our efforts to improve the quality of the data that we present and shall be most grateful for advice and suggestions from our readers for improving it in the future.

Section I: Inputs by PPHI Sindh

1.1: Human Resource at Health Facilities:

S.No.	Type of PHC-HFs	GOVT Staff	SRSO / PPHI Staff	Total Staff	%age PPHI Staff
1	Medical Officer (Male)	363	722	1085	67%
2	Female Medical Officer	21	398	419	95%
3	Dispensers / HT's	864	630	1494	42%
4	LHVs / MWs	470	579	1049	55%

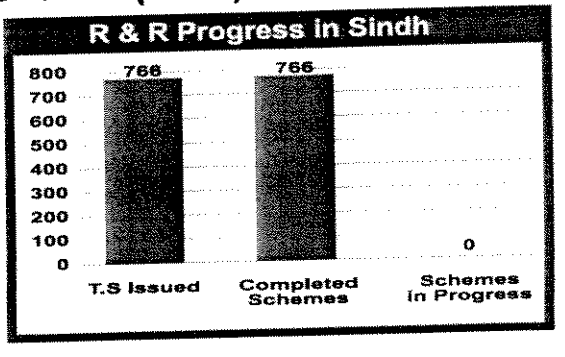
PPHI has filled a HR gap through appointment of Medical and Paramedical staff at HFs. People can now expect to benefit from the huge investment of the state in various Preventive, Promotive and Curative programs. In addition, PPHI has brought Lady Doctors . first time ever in the history of the country . to the HFs in villages. This has fundamentally changed the Health environment for the rural women. It has created a huge opportunity for PPHI to increase vaccination, antenatal care, deliveries at HFs and utilization of contraceptive materials.

Source: The data has been collected on HMIS/DHIS format from all incharge MOs of HFs. There has been no comment on its validity from any StakeHolders.

1.2: Physical Infrastructure

District-Wise Repair and Renovation(R&R) Status:

Most of the 1,139 HFs with the PPHI deplorably dilapidated. GOS, on proposal from PPHI, approved a special grant of Rs 500,000/BHU and Rs 300,000/GDs for repair and renovation. By end of year 2013, PPHI has completed repair & renovation at 766 HFs. PPHI has completed these repairs at 35% less than the Government gScheduledh of Rates.h Routine maintenance of HFs has not been overlooked either.



Construction of Medicine Warehouses from Savings:

Construction of 3 modern medicine warehouses for Rs. 62 million in district Thatta & Badin are completed and are in use since 2013 whereas Khairpur is near to completion.

1.3 Making Mother and Child Health Centres (MCHCs) Operational:

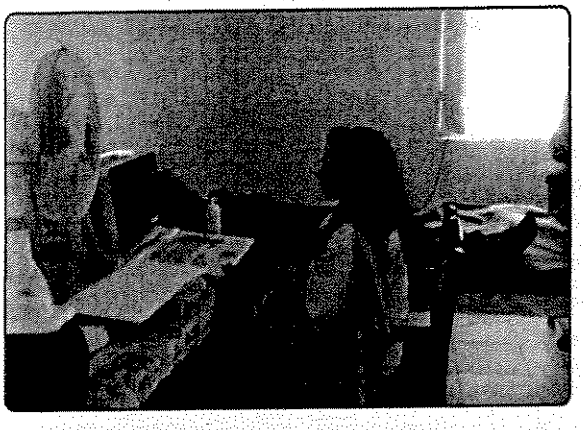
/ŏwjo round-the-clock MCH Center is available in the rural areas.

PPHI has made an important beginning with 37 MCHCs operating 24/7 and 6 MCHCs operating 12/6. These MCHCs are equipped with Diagnostic Labs and Ambulance connectivity. This is just a beginning.

Source: The data has been collected on HMIS/DHIS format from all incharge MOs of HFs. There has been no comment on its validity from any StakeHolders.

1.4 Mobile/Stationery Ultrasound Tests Facility:

For the first time in the history of Sindh, PPHI had brought the facility of Ultrasound Tests to its villages.



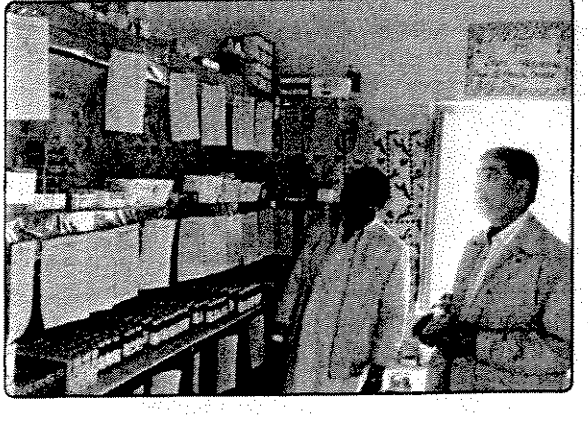
PPHI is now using 81 high quality Ultrasound Machines, with portable generators to ensure un-interrupted power supply. PPHI is employing 35 Sonologists and assigned them cluster of 8 to 10 HFs for conducting Free-of-Cost Sonograms for women and sharing findings with I/c Lady Doctor of the PPHI. Schedule of Sonologists is circulated in advance and widely publicized. LHWs of the area are also encouraged to refer pregnant ladies for Ultrasound tests. Please see the Ultrasound Tests by PPHI coverage data below.

PPHI Free Ultrasound Services

No. of HF with fortnightly Ultra Sound coverage	No. of HF with Weekly Ultra Sound coverage	No. of HF with Daily Ultra Sound coverage
150	73	33

1.5 The New Pharmacies

PPHI is providing 90 medicines & 20 related items to the Patients at every HF free of charge. These



medicines are procured from National & Multi-national Pharmaceuticals of good repute. No medicine is supplied to a HF without Quality Tests at Government Laboratories. Only, packed or stripped medicines are supplied at HFs. In this way, the Pharmacies at rural HFs have improved in terms of quantity, quality and coverage.

Disposable syringes are provided at every HF. It is ensured that regular supply of medicines and material are delivered at the HF through centralized arrangements at the District level.

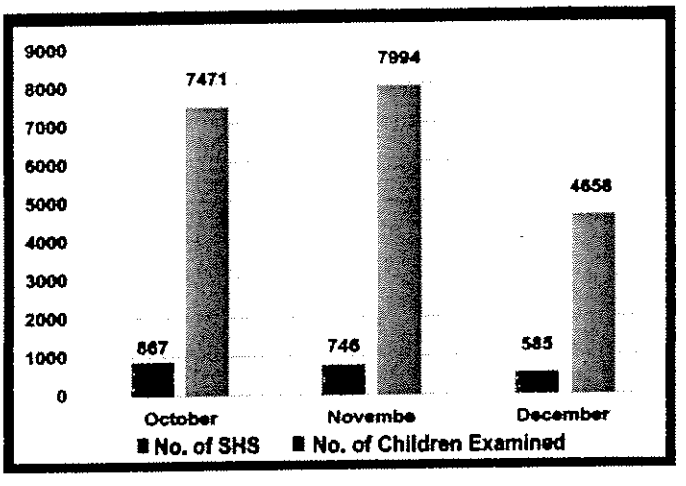
Source: The data has been collected on HMIS/DHIS format from all incharge MOs of HFs. There has been no comment on its validity from any Stake-Holders.

1.6 Health Education

School Health Sessions are a regular feature at Schools in the catchment area with the object of providing Education on key Health issues, healthy life and avoidance of disease.

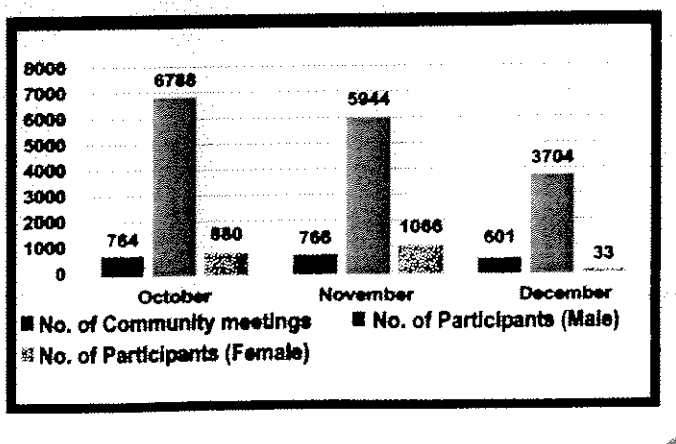
Doctors are also expected to provide medical assistance to school children during School

Health Sessions. Health Education is also provided to the community on a regular basis every month.



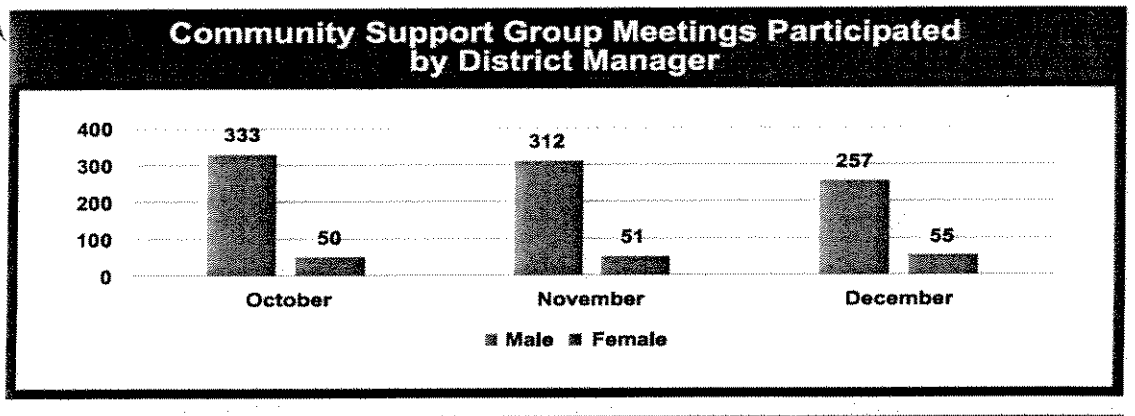
1.7 Community Participation:

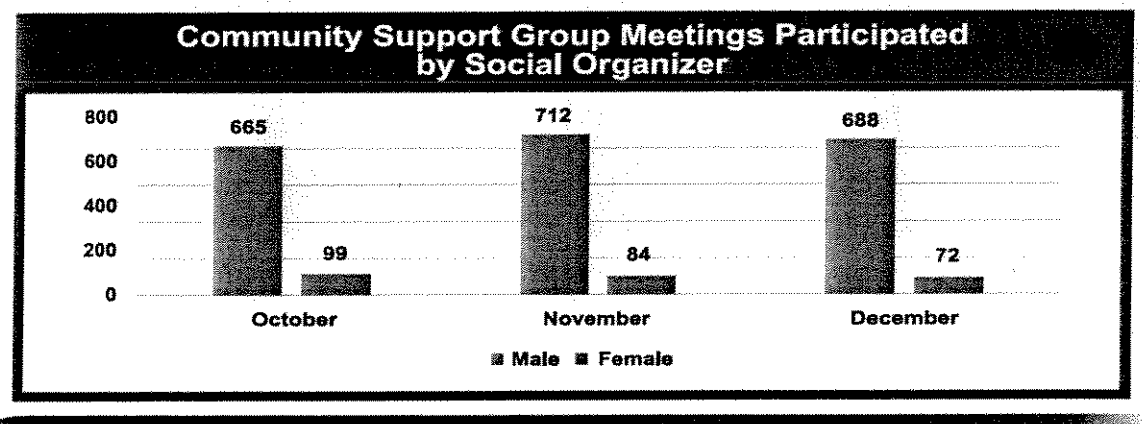
To connect community with HFs, 1,139 Community Support Groups (CSG) have been formed (109 are female Support Groups, 932 are Male Support Groups). Exhaustive TORs have been developed on how these Groups are to be formed, how frequently these are expected to meet and enrich the deliverable services. Minutes of Monthly CSG meetings are recorded and updated at every HF.



Source: The data has been collected on HMIS/DHIS format from all incharge MOs of HFs. There has been no comment on its validity from any StakeHolders.

1.7.1 Community Support Group Meetings Participated by District Manager and SO's :





1.8 Capacity Building of Healthcare Providers:

Training of Healthcare Providers for meeting old and new challenges & for better facility management has been a regular priority. PPHI always welcomes participation in Government/NGO run training programs as well as conducts specialized sessions of its own. Under contractual arrangement, Civil Hospital Karachi is providing 06-weeks Ultrasound training to PPHI Lady Doctors from far flung areas. Beside Specialists, Focal Persons for Vertical Programs and other stakeholders are regularly invited to conduct training sessions at "Monthly Review Meetings" in the Districts.

S.NO	Name of trainings	No of participants trained
1	Helping babies breathe (HBB) trainings	756
2	Infection prevention training	638
3	HBB Training of trainer	15
4	Antenatal care, Labor and delivery, Post natal care	740
5	Family planning implants	630
6	ToT on Curative Services	30
7	Curative Services	1480

Source: The data has been collected on HMIS/DHIS format from all incharge MOs of HFs. There has been no comment on its validity from any StakeHolders.

1.8.1 Capacity Building of District Office Staff:

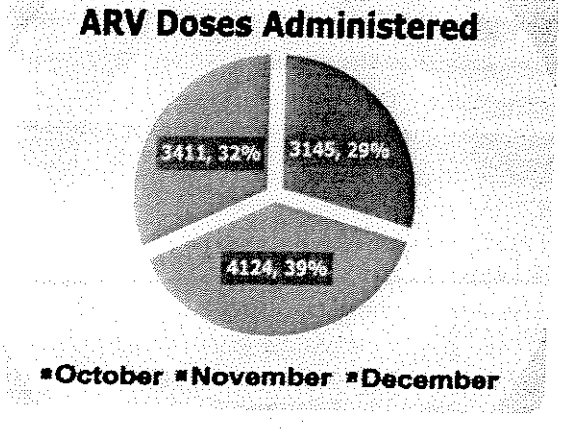
Induction Training for the all District Managers, Monitoring Staffs Managers etc. Training participated by CEO , COO , Director HR at Head Office, Karachi Training was conducted by Director HS , CFO , SMIT regarding District Health Information System , Financial Managment and Smart Phone Monitoring.

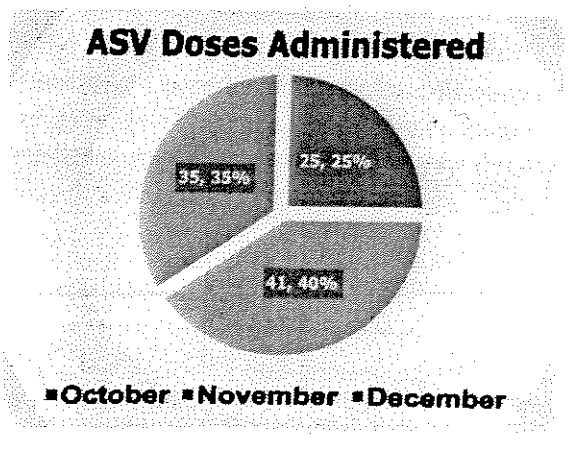
1.9 Addition of PPHI Vaccination Centers

Routine vaccination is the only answer to achieve Health Output Indicators. At the 1,137 HFs with the PPHI, there were only 425 EPI Refrigerators available. PPHI has added 155 new Cold Chain Points and appointed the same numbers of Vaccinators. EPI as a ..Progra....is not with PPHI management nor PPHI receives funding earmarked for EPI.

1.10 Anti Rabies & Antisnake Venoum Vaccine used

PPHI has provided 96,244 Anti Rabies Vaccinations (ARV) at its focal HFs with IM regime. All Districts have budget for ARV/ASV vaccines. It is only PPHI that is providing these vaccines.



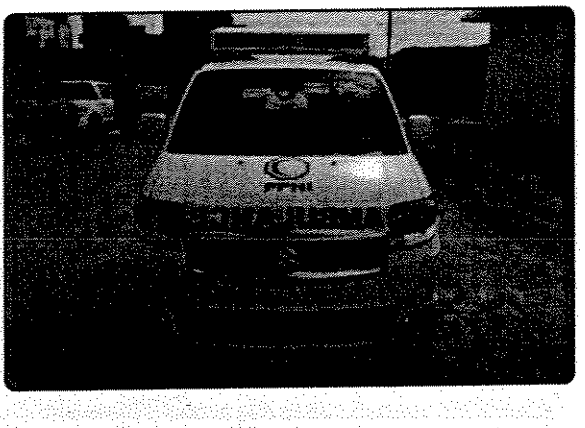


Source: The data has been collected on HMIS/DHIS format from all incharge MOs of HFs. There has been no comment on its validity from any Stake-Holders.

1.11 PPHI Ambulance Service:

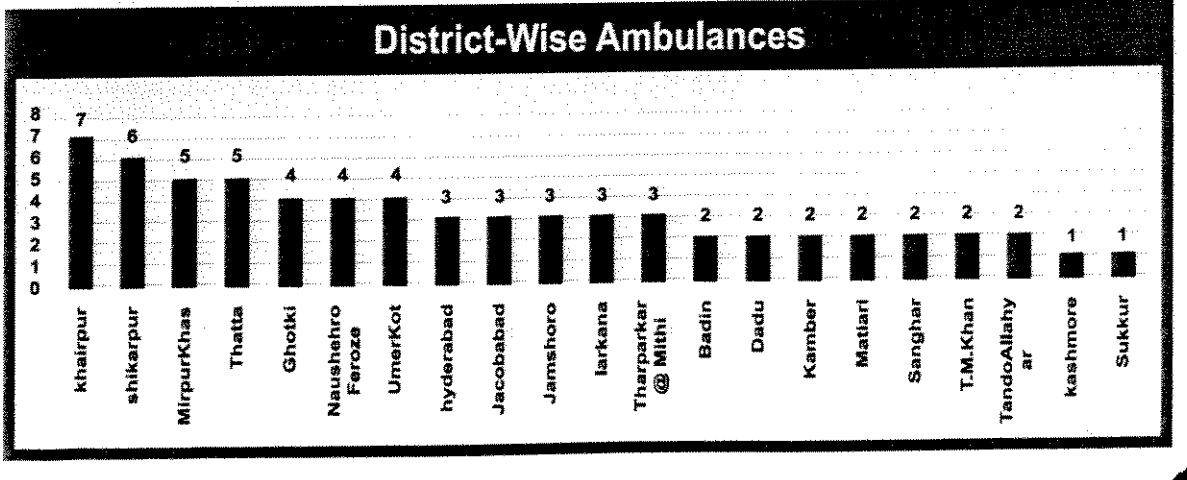
PPHI has made a land mark addition to the range of its services by introducing Ambulance service to make referral system purposeful. In the first phase, 66 Ambulances, including:

- 6 Advanced Cardiac Life Support (ACLS) Ambulances,
- 25 basic life Support Ambulances,
- The aforementioned 36 Ambulances have trained Doctors and staff accompanying patients in distress. Besides, every 24/7 MCH Center has been provided dedicated Ambulance for strengthening referral system.



1.12 Value addition services

- BHUs Provided Lab Facility : 71
- BHUs Provided Ambulance : 61
- BHUs Provided Electricity: 493
- BHUs Provided Solar Power : 37
- BHUs Provided furniture/Equipment: 1050
- BHUs Provided Water Supply :654
- BHUs Provided Labor Rooms : 647
- BHUs/MCHC Provided generators:35



Source: The data has been collected on HMIS/DHIS format from all incharge MOs of HFs. There has been no comment on its validity from any StakeHolders.

1.13 ESTIMATED TARGETS VIZ A VIZ PERFORMANCE INDICATORS

Total catchment area population catered by the PPHI HFs in Sindh is 14,434,904. Realistic target setting is for keeping track of performance of an HF. PPHI took all stakeholders on board and targets were set as per DHIS Policy by each District to rate their performance viz a viz (1) Daily OPD Attendance (2) Full Immunization coverage (3) Ante-Natal care(ANC-I) (4)Data Accuracy (5) Delivery coverage at Facility (6) TB- DOTS patients missing more than one week (7) Total Visits for Family Planning (FP) (8) LHW pregnancy registration.

District	Total Health Facilities	Total Catchment Population	OPD Attendance (#)	Full Immunization Coverage(#)	Antenatal care (ANC-1) Coverage (#)	Delivery Coverage at Health Facility (#)	TB-DOTS patients missing more then one week (#)	Total Visits for Family Planning (#)

2.7 Success Story of District Manager Jamshoro

Mr. Riaz Ahmed Jakhrani Joined the PPHI District Jamshoro from January 2014. District Jamshoro is one of the toughest districts of Sindh regarding the provision of any kind of services and managerial aspect. Regarding the provision of standard health care on PHC level it was very difficult task in the District Jamshoro, which was owned by this person. After taking over the management of PPHI DO Jamshoro, Mr. Riaz Ahmed Jakhrani developed the District Jamshoro in every aspect, from the Standard quality of care to decorum of health facilities including plantation, repair and renovation, purchase of new items, instruments and equipments etc. The Main achievements of Mr. Riaz are; the Development of Mini-Laboratories in remote health facilities of District Jamshoro without any extra budget, Publication of community Health Awareness Book written by Dr. Zakir Ali Punar, Development of Website of PPHI District Jamshoro, Training of LHVs and Midwifes at LUMHS Jamshoro for the Improvement of Quality of Care, Implementation of Emergency Box at Every Health Facility etc. As a Manager, Mr. Riaz Ahmed Jakhrani is very competent, daring and keen hard working person, very quick and brilliant minded in decision making and taking right decisions at right time. He is also very supportive to his staff and a good team worker.

2.8 Success Story of PPHI Sindh – Jacobabad

The district office Jacobabad focused on the Mother & Child Health (MCH) services for the poor people of Jacobabad through Female Medical Officer and Community Midwives. The PPHI Jacobabad recently appointed two Female Medical Officers and 4 CMWs in the Hard Areas of district, in this regard the overall MCH performance / indicators increased through appointment of Female Healthcare providers. Moreover keeping in view the increase trend of Hepatitis B&C the PPHI Jacobabad implemented the "Infection Prevention" protocols with letter and spirit.

Followings are the indicators of MCH services, which clearly show the confidence of the community on the Female Healthcare providers of the PPHI Jacoababad.

BEST DISTRICT MANAGER (SUKKUR)

PPHI Sukkur is providing service at 35 HFs located in 23 Union Councils of the district. Total OPD attended at PPHI Sukkur HFs in year 2014 reached to 844,476. The district manages three (03) MCHCs whereas cover of Female Healthcare Providers is available at 32 HFs. Data tabulated in following table speak of the trust posed by the community on PPHI Sukkur run HFs.

ANC-1	ANC Revisit	PNC	NVD	D&C/D&E	FP	Ultra Sound
21092	23710	3153	1995	189	10161	27120

PPHI Sukkur started three new complete laboratories in year 2014 bringing total number to five in the district. This fact has always been appreciated by all those who have visited PPHI Sukkur HFs.

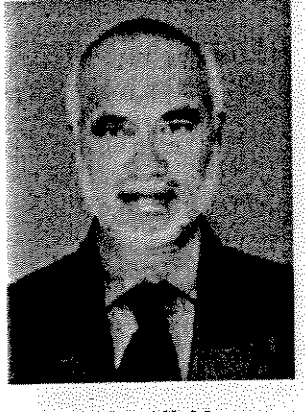
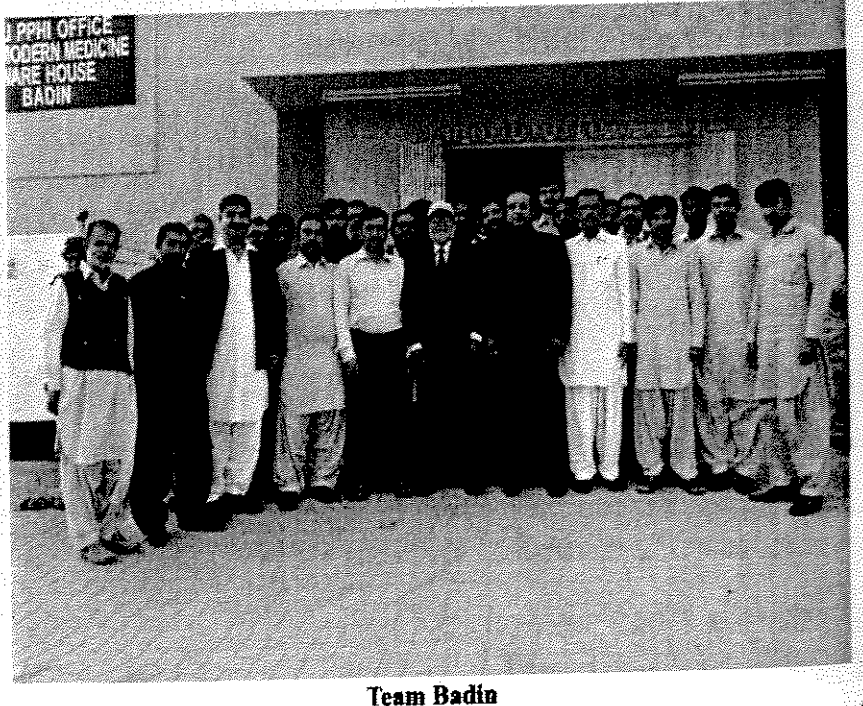
BEST DISTRICT MANAGER (BADIN)

Badin district is located in coastal area and it is most deprived and ignored area of sindh province, as administration 5 taluka and 46 union councils in district, Badin is most prone area due to disasters. There is lot of problems like education quality , health services etc , PPHI is one hope for poor people of Badin , Badin is largest district in sindh in which 103 health facilities are working successfully in under the shadow of PPHI. PPHI is working from 2007 to date, in this journey pphi faced lot of issues but now quality of health services improved like in areas as under:

- Started 6 MCH Centre and mostly are working 24/7
- Tubal Ligation Procedure started from Mch Centre Badin
- Improved health services at centres
- Maternal care services and family planning services enhanced through community participation
- Drinking water facility provided in many centres and trying to cover all centres
- Hygienic conditions improved in all centres
- Labority services started in all centres
- Capacity building trainings and demonstrations arranged as per need
- Implementation of DHIS at all Health Facilities
- Reconnection electricity services in areas



Big. Dr. Allahbux Rang (Reg)



Team Badin

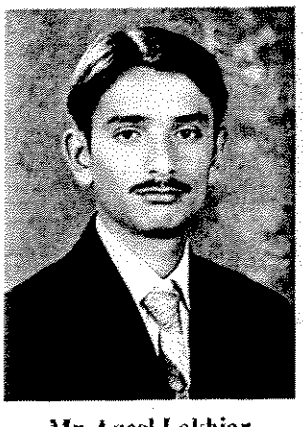
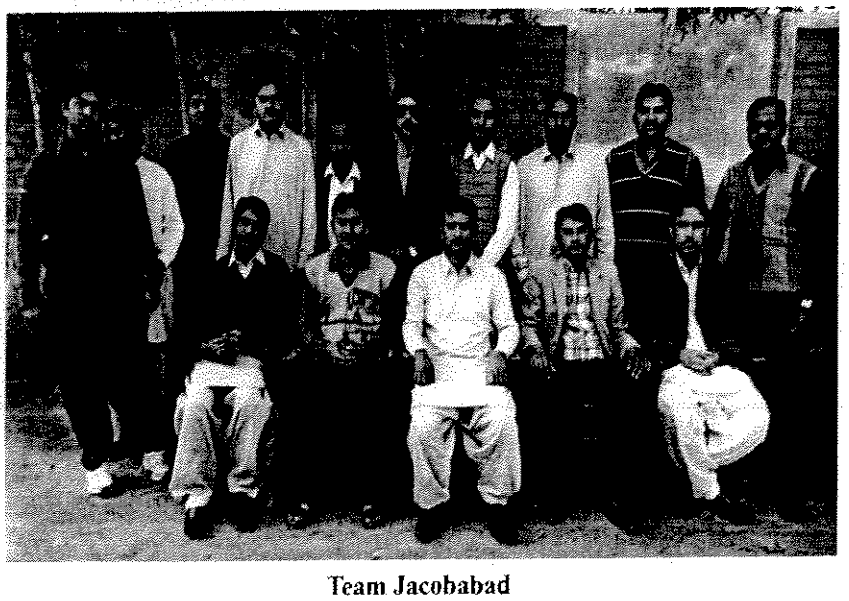
BEST DISTRICT MANAGER JACOBABAD

- Mr. Aqeel Lakhiar is one of the pioneer officers in PPHI Sindh joined PPHI in July 2008 as an Executive (Finance & Accounts) at District Matiari, later on within a year i.e in May 2009 he has been promoted at Regional Executive (Finance & Accounts) at Regional office Hyderabad. He has also served as Manager Internal Audit at PPHI, Head office Karachi. In February 2014 the management of PPHI further recognized the services of officer and posted as "District Manager" Jacobabad.
- The Management of PPHI Sindh, would like to extend appreciation for the amazing work done by the officer. The endless hours that he has spent working in PPHI Sindh, and the professionalism that he has portrayed has impressed the entire team immensely and we deem ourselves honored to the responsibility of hardest district of the Sindh, i.e Jacobabad.
- Mr. Aqeel Lakhiar served in PPHI in most of the departments such as Accounts, Finance, Audit, monitoring and management with the zeal and enthusiasm and completed whatever the tasks assigned by the PPHI management.
- District Manager and his team played a vital role to implement all services of PPHI in the nick of object of the organization such as implementation of "Smart Phone Monitoring", achieving the monitoring targets, implementation of self assessed medicines control mechanism by the ICMOs themselves. During his management the DHIS indicators increased remarkably such as ANC cover, NVDs and Family planning which shows the commitment of DM and his team.
- Keeping in view the increased trend of Hepatitis B&C the management of PPHI Jacobabad further focused on "Infection Prevention (IP)" which is implemented all over the labour rooms of HFs of PPHI Jacobabad through trainings to the Female Medical Officer, Medical Officers and Community Midwives, which was the key and successful achievements of District Manager during the year 2014.
- The management of PPHI Sindh wishes him good luck, with the hope that he will serve PPHI with the same passion, commitment and dedication.



Mr. Aqeel Lakhiar



Team Jacobabad
